

IDEAS

* choropleth map
(too hard to draw)

Categorise

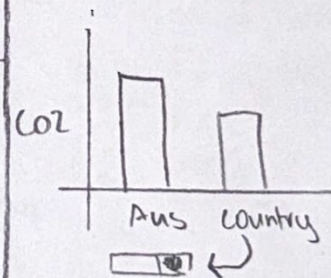

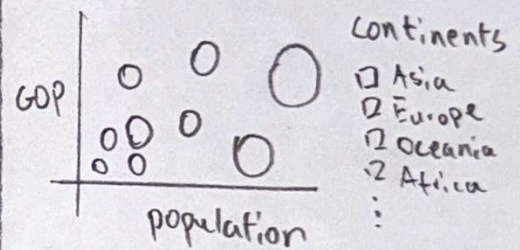

CO2 emission

↓
Country

↓
population

↓
GDP

Combine & Refine

FILTER

- * Choropleth map
- CO2 emission
- time
- size (zoom in)

filter by:

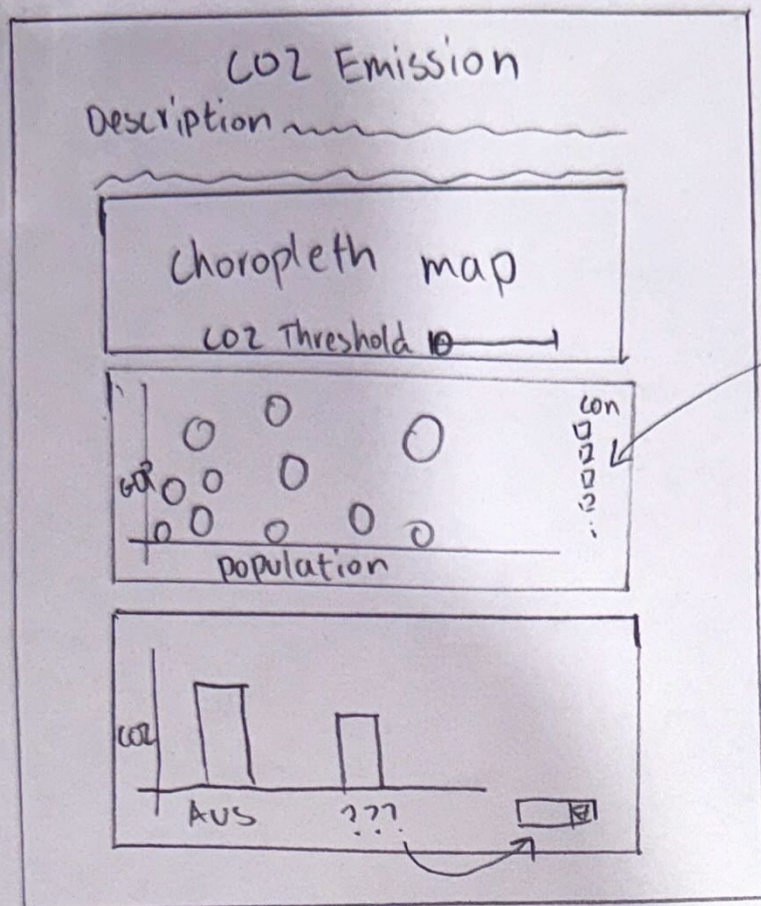

1. Continent
2. Country
3. population
4. CO2 emission

Questions

* Should time (years) be included as a category?

* Is the visualisation enough?

Layout

Title: Poster 1

Author: Zhi Wang

Date: 10/10/2024

Sheet: 2

Task: Design first poster view

Operation

- * User has initial view of the map which gives a general impression of CO₂ emission, such as ranking, at the first view.
- * Then a bubble chart is displayed to show the relation between population and GDP and their effect on CO₂ emission.
- * Then a bar chart is given at the bottom to show clear comparison between Aus and other countries.

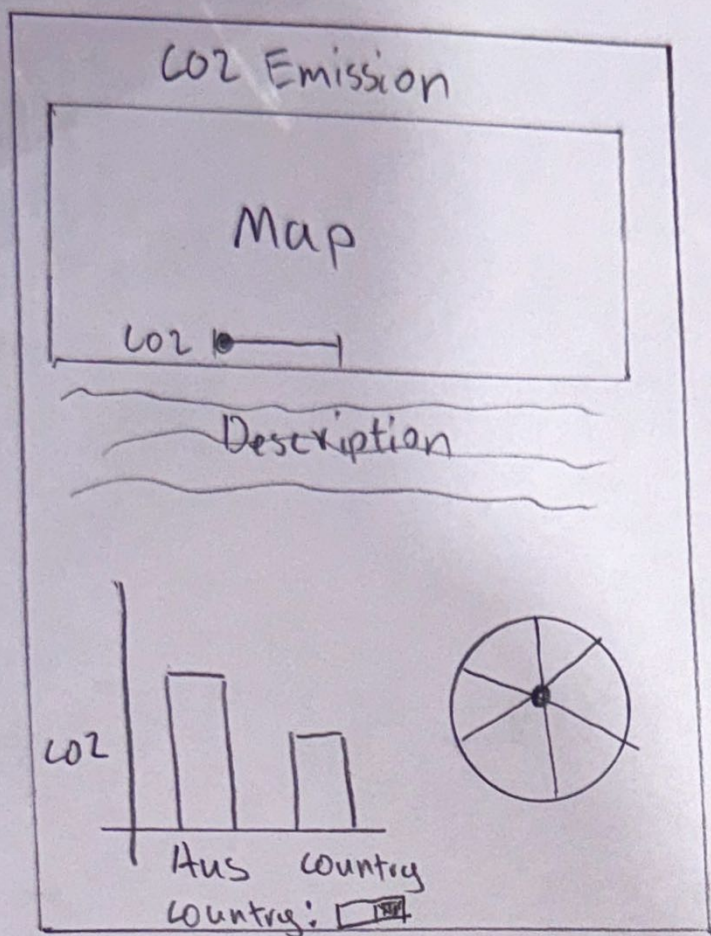

Focus

- * The 3rd chart is set to default of Aus, can compare with other countries
- * Chart 1 and 2 gives an overview of CO₂ emission of the world, which can display how Australia is doing in the international.

Discussion

- * The idea of compare Aus to the world is not ~~clear~~ standing out.
- * cannot see each cities in Australia.

Layout

Focus

- * Display map at top to give general image of CO2 emission by countries.
- * bar chart on left bottom allows comparison for Aus to other countries.

~~Min~~

Title: Poster 2

Author: Zhi Wang

Date: 11/10/2024

sheet: 3

Task: Design 2nd poster view.

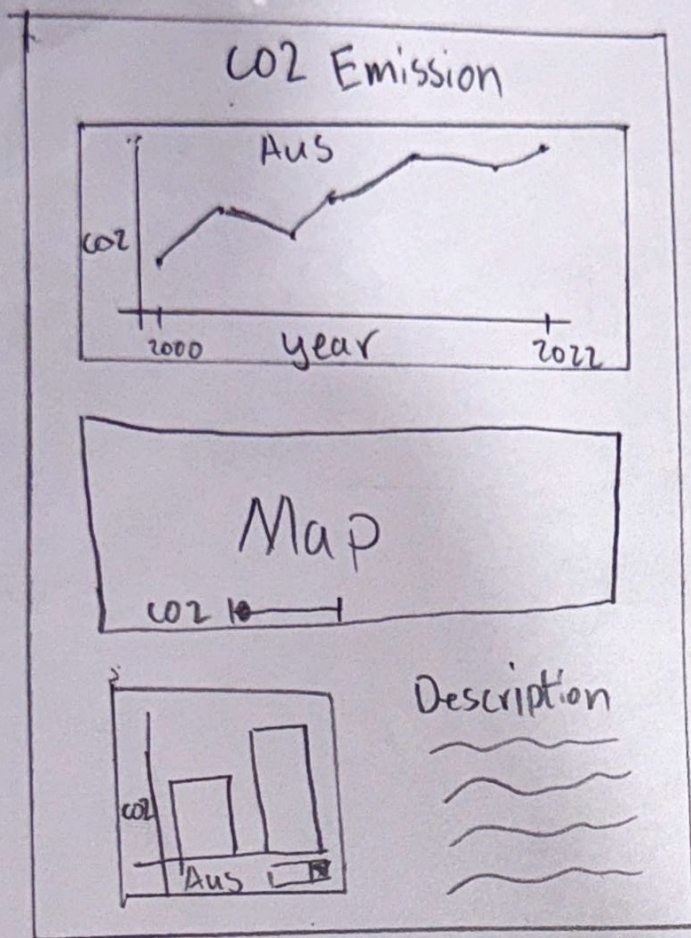

Operation

- * The map includes a CO2 threshold slider where it shows the user the ranking of CO2 emission.
- * Bar chart allows user to select a country to compare against Aus through a drop down box.

Discussion

- * The pie chart will contain too many sectors

Layout

Title : Poster 3

Author : Zhi Wang

Date : 11/10/2024

Sheet : 4

Task : Design third poster view.

operation

- * Map has threshold filter to view the rank of CO2 emission by countries
- * Bar chart allows comparison with Aus and selected country

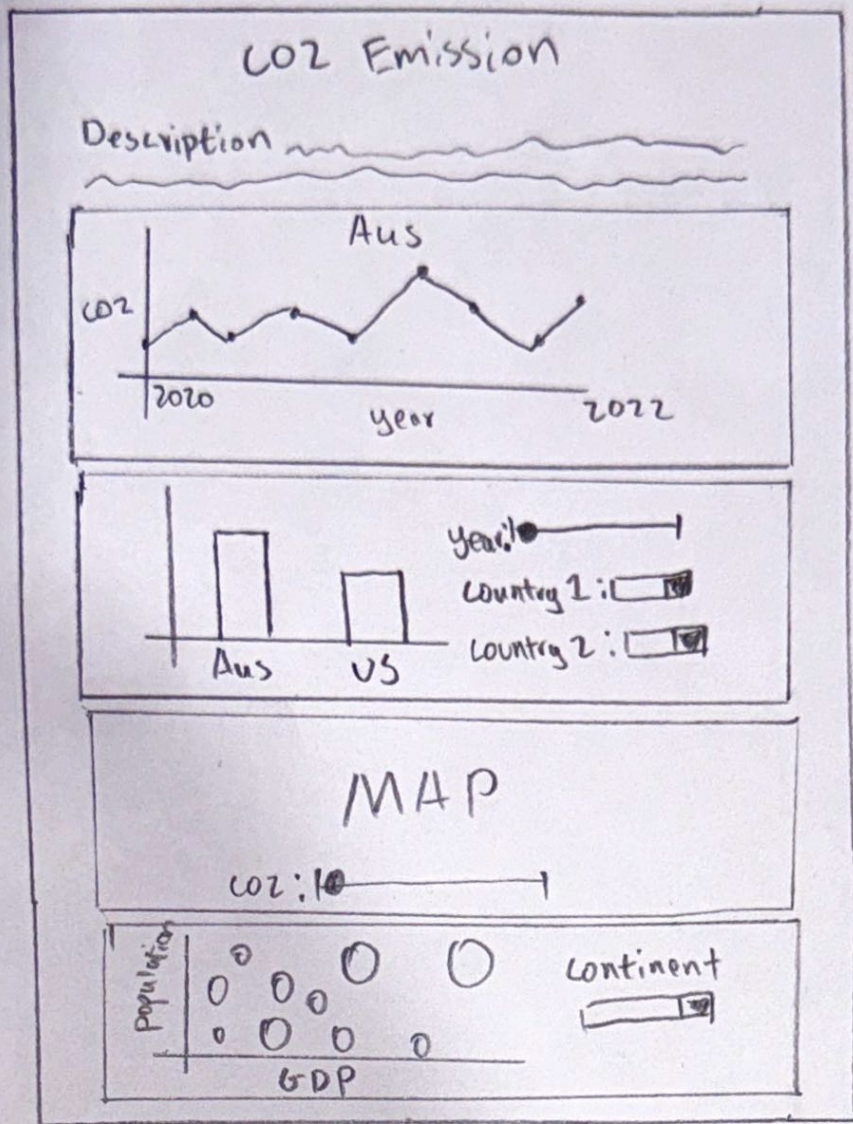

Focus

- * This poster starts with displaying the history of CO2 emission from 2000-2022 with a line chart.
- * Then it shows the general with the map
- * Then it allows user to compare Aus to other country

Discussion

- * Is the ranking shown in a clear method?
- * Is the description necessary?

Layout

Title : Final design

Author: Zhi Wang

Date : 11/10/2024

Sheet : 5

Task : Final design

Operation

* Bar chart allows to choose year, both countries as data to compare. Country 1 is set to Aus as default.

* Map allows to filter through threshold to see ranking

* Bubble chart allows filter through continent for smaller group of rankings.

Detail

* Data cleaning.

only country, year, population, CO2 are needed.

Focus

This final view focuses on Aus CO2 emission, it first displays the past CO2 emission of Aus, then allows comparison for Aus against other countries.

Towards the end, it also gives an info of how Aus is doing internationally by showing info of other countries in map and bubble chart.
